

Cubic unit cooler

NK industrial range

- The NK range is designed for industrial refrigeration, conservation or deep-freezing applications.
- **NK version T** (large heat-exchange surface):
 - Adapted to humidity-sensitive products.
 - Reduced number of daily defrost cycles offering a reduction in electrical power consumption.
- **NK version H** (high efficiency):
 - Adapted to the storage of packed products.
- Economical choice, wide range of options for specific industrial applications (pressure sleeve, defrost...)
 - 4 fin spacing distances: 4,23 - 6,35 - 9 - 12 mm.
- 2 fan diameters for air throw adapted to the application.
- Two-speed fans as standard.

Natural fluids:
Glycol water
CO₂ (R744)*

* Low temperature applications - Operating pressure 50 bar

8  130 kW

NK - Cubic industrial unit cooler

Market segments

FCS Refrigerated storage and transit stocking – Food processing – Dispatch centres

Description

Casing

- The casing is made of pre-painted, galvanized steel offering a high resistance to corrosion and impact damage.
- An internal aluminium drain pan limits the effects of condensation under the main drain pan during the defrost process.
- The NK unit coolers are delivered in mounting position in reinforced crates (ECB option).

Ventilation

- The external rotor fans are equipped with fan guards compliant with safety standards.
- 2 fan types are used for the NK range:
 - Ø 630 mm 4/6 pole (1,500/1,000 rpm) - Ø 800 mm 6/8 pole (1,000/750 rpm).
- The motors are of the three-phase type, 400 V, 50 Hz, IP54, class F.
- Selection of a unit cooler with various fan number/diameter combinations offering the dimensional and air throw characteristics best adapted to the size of the cold room.

Coil

- The finned coils of the NK range are designed with aluminium fins spaced at 4,23 - 6,35 - 9 or 12 mm, crimped onto copper tubes.
- Two types of fins are available depending on the application:
 - High-efficiency H type fins for an economical solution. This type of fin is particularly suitable for the storage of packed products. The reduced size of the heat-exchanger also enables fast defrosting.
 - T type fins with a large heat-exchanger surface. This type of fin limits dehydration of products. It also saves energy by reducing the number of defrost cycles per day;
- The coils are supplied via optimized R404A diaphragm distributor(s).
- For all other refrigerants, please contact us and specify when ordering.

Defrost

NKH ... C, NKH ... S, NKT ... C, NKT ... S, and NKT ... T

- The shielded electric heating elements are inserted in sleeves located in the finned coil, 2 or 3 heating elements are placed under the intermediate drain pan.
- This facility enables homogenous heat distribution for fast and efficient defrosting.
- The heaters are factory connected to a 400V/3 power supply on a terminal block in a junction box.
- Total gas defrost (HGT) or partial (HG1) available as optional extra.

NKH ... R, NKH ... L, and NKT ... L

- Light electric defrost (E1U) and "low temperature" electric defrost (ELU) models available as optional extra.
- The light electric defrost (E1K) is also available in kit form.
- A water defrost (DAE) option is available for room temperature equal to or greater than +4° C. In this case the unit cooler depth is increased by 40 mm.
- Maximum water flow-rate with NK:
 - 1 fan = 5 m³/h. - 2 fans = 10 m³/h.
 - 3 fans = 15 m³/h. - 4 fans = 20 m³/h.

Certifications

Designation

NKH⁽¹⁾ **3x6**⁽²⁾ **D**⁽³⁾ **B2**⁽⁴⁾ **R**⁽⁵⁾

(1) Fin type:

T = Large exchange surface - **H** = High-efficiency fin

(2) Number of fans x Ø: **6** = Ø 630 mm - **8** = Ø 800 mm

(3) Motor connection: **D** = Delta - **Y** = Star

(4) Module

(5) Fin spacing: **R** = 4,23 mm - **L/C** = 6,35 mm - **S** = 9 mm - **T** = 12 mm

Advantages

Installation

Electrical and refrigerant connections easily accessible for simple installation.

The height-adjustable leg supports enable floor mounting of the unit (KMS option).

Servicing / Maintenance

The galvanized steel side panels and drain pan are hinge-mounted: easy intervention, maintenance and cleaning.

External installation of fans offering easy access for possible interventions.

Options

Ventilation

Electric fans 230-400V/3/60Hz.

Motors factory wired.

Motors wired for 2 speeds.

Air pressure shell also allowing the connection of a textile duct.

Flexible defrost sleeve + air pressure shell.

Coil

Paint coil protection.

Blygold Polual XT coil protection.

Glycol water, coolant (please contact us for details).

Glycol water extension

(please contact us for details).

R744 optimization (please contact us for details).

Defrost

Light electric defrost (coil + drain pan).

Additional coil electric defrost.

Electric defrost (coil + drain pan).

Hot gas defrost

(coil: hot gas, drain pan: electric heaters).

Hot gas (coil and drain pan).

Shell defrost heaters.

Water defrost.

Miscellaneous

Full crate packaging.

Insulated drain pan.

Floor-mounting legs.

Other options

Please contact us for details.

NK - Cubic industrial unit cooler

Application of options

C2V option (2-speed wiring)

Adapted ventilation and noise level:

High speed during the charging phase requiring high capacity.

Low speed during the long storage period or in case of presence of employees for reduced noise level.

VPA option

Homogenous distribution of air flow:

Increased air throw, optimized air flow and efficient distribution of air in the cold room.

Application requiring installation of a textile duct:

Shell for textile duct with air stream deflectors (ducts not provided).

VPM option

Defrost for low-temperature applications :

Avoid circulation of hot air during defrost cycles.

Reduction of defrost cycle time for energy saving.

* Ø 630 mm : 400 V/3/50 Hz - 1500 rpm : Δ = 1900 W max - 3,20 A max - Y = 1200 W max - 1,95 A max (5)

* Ø 800 mm : 400 V/3/50 Hz - 1000 rpm : Δ = 2000 W max - 4,00 A max - Y = 1250 W max - 2,30 A max (5)

(1) See page 10.

(2) Residual air speed: 0.25 m/s, in compliance with standard.

(3) Electric defrost options.

(4) Electric defrost kit.

(5) Setting of overload protection levels. For air temperatures "ti" other than +20 °C, multiply the currents in relation to 293/(273 + "ti") in order to obtain an approximate current value after the room temperature is attained.

(6) For motor connection in star (Y) instead of delta (D), refer to the correction factors.

(7) Average sound pressure level in dB(A) measured at 4 m, at fan height, in direct line of sight on a reflective surface, given for information only.

* Ø 630 mm : 400 V/3/50 Hz - 1500 rpm : Δ = 1900 W max - 3,20 A max - Y = 1200 W max - 1,95 A max (5)

* Ø 800 mm : 400 V/3/50 Hz - 1000 rpm : Δ = 2000 W max - 4,00 A max - Y = 1250 W max - 2,30 A max (5)

(1) See page 10.

(2) Residual air speed: 0.25 m/s, in compliance with standard.

(3) Electric defrost options.

(4) Electric defrost kit.

(5) Setting of overload protection levels. For air temperatures "ti" other than +20 °C, multiply the currents in relation to 293/(273 + "ti") in order to obtain an approximate current value after the room temperature is attained.

(6) For motor connection in star (Y) instead of delta (D), refer to the correction factors.

(7) Average sound pressure level in dB(A) measured at 4 m, at fan height, in direct line of sight on a reflective surface, given for information only.
